

Cultivating Success in Beginning Farms through Empowerment with Training, Incubation, and Technical Support to Build Resilience in Critical Years

Dr. Sridharan (Sri) Sethuratnam

Project Organization:

Goal

The goal of this project is to enhance the sustainability and success of start-up and advanced beginning farmers by increasing their knowledge base, providing on-farm learning opportunities, technical and business assistance, and marketing support through a network of partners, and access peer/mentor networks.

Project Partners:

Project Outputs

- Aspiring farmers report increase in knowledge and skill
- Aspiring farmers create action plans to start their farm enterprise
- Advanced beginning farmers gain skills in welding, tractor maintenance, and irrigation
- Advanced beginning farmers have access to professional business services
- Creation of peer and mentor networks to support beginning farmers
